

# InnoEducaTIC 2021

VIII Iberoamerican Conference of Educational Innovation in the fields of ICT and TLK

Las Palmas de Gran Canaria – November 18-19, 2021

<http://www.innoeducatic.es/>

The VIII Iberoamerican Conference of Educational Innovation in the fields of **Information and Communication Technologies** (ICT) and **Technologies for Learning and Knowledge** (TLK) intend to be a forum for discussion, exchange and dissemination of teaching experiences in the realm of Educational Innovation and Research. In this conference, different topics related to methodologies and teaching strategies with ICT will be addressed in addition to the use of TLK not only in higher education but also in non-university programs. This conference is presented as a platform where the participation of teachers, education managers, researchers and students will deal with issues related to: acquisition and verification of skills, methodologies and resources for teaching-learning, use of new technologies, quality management of degrees, as well as other matters related to educational innovation.

Far from doubt, this edition is conditioned by the outbreak of the COVID-19 pandemic, which has forced a sudden process of academic adaptation to online teaching methods. This fact has been an unprecedented challenge for the entire educational community that has modified the teaching-learning methodologies in an unpredictably short period of time. For this reason, the conference will put special emphasis on the dissemination, discussion and analysis of teaching-learning experiences carried out in this context, as well as the new challenges and opportunities that have emerged.

## Important Dates

### Deadline for conference submissions:

October 18, 2021

### Notification of acceptance:

October 27, 2021
