

InnoEducaTIC 2023

X Iberoamerican Conference of Educational Innovation in the fields of ICT

Las Palmas de Gran Canaria – 16th-17th November 2023

<http://www.innoeducatic.es/>

The X Ibero-American Conference on Educational Innovation in ICT is an event that brings together dedicated educators from diverse geographical backgrounds with the aim of promoting the transformation and improvement of teaching and learning.

It is important to highlight that, while technology plays a fundamental role in 21st-century education, our primary focus will always be on the pedagogical aspect. Technology is a tool that allows us to expand our educational possibilities, but it is the quality of teaching and the commitment of educators that truly makes a difference. During this conference, we will dedicate time to discuss and reflect on cutting-edge methodologies and emerging educational resources, with an emphasis on those driven by artificial intelligence, while keeping in mind that our ultimate goal is to create an inspiring educational future.

We invite you to share your knowledge, learn from passionate colleagues, and contribute to the advancement of educational innovation in ICT. Let us take advantage of this conducive space to establish connections, exchange ideas, and generate collaborations that drive our work as educators. Together, we will build a future where technology and pedagogy effectively complement each other, providing quality education and preparing our students for the challenges of the 21st century.

We are confident that the X Ibero-American Conference on Educational Innovation in ICT will be days filled with inspiration, learning, and collaboration.

8. Integration and orientation of students
9. Coordination and monitoring experiences
10. Digital skills
11. Applications of Artificial Intelligence (AI) in Education
12. Other aspects of Educational Innovation

Conference submissions online and Conference proceedings

Conference submissions are subject to a double-blind peer review process so that authors will add these data in the final version of their proposal once it has been accepted.

Conference papers can be sent in Spanish or English. A book of proceedings with ISBN number will compile all the accepted contributions. The proceedings of the Conference will be published in the institutional repository of the Universidad de Las Palmas de Gran Canaria (accedaCRIS).
